Tomorrow's kitchen ?

Technology must serve chefs for more productivity, performance and flexibility throughout the day.

■ Productivity & Performance

Professional kitchens are demanding environments and chefs require more and more productivity and performances.

Now, kitchen equipments adopt new technologies to provide kitchen operators better tools to reach ever more ambitious goals.

■ Modern & Flexible

Multifunctional pans and combi ovens become pillars of the kitchen.

But chefs will always need flexibility, plan B to achieve their mission: serve quality food to demanding customers, no matter what !

Precipan Installation exemple

Precipan ... at a glance.

★ Don't wait for tomorrow...

The answer to your needs today is **Precipan: a multifunctional unit that can braise, sauté, cook, fry.**

Precipan can be associated to modular equipments or combis, to provide the most optimized and ergonomic solution.
